

Equality

Find a number for the blank so that the equation is true. Is there more than one number that will make the equation true? Why or why not? Can you find more than one way to find a number for the blank so that the equation is true?

6. $3 + 6 = 1 + \underline{\hspace{2cm}}$

7. $2 + 5 = 4 + \underline{\hspace{2cm}}$

8. $9 + 1 = 2 + \underline{\hspace{2cm}}$

9. $7 + 5 = 4 + \underline{\hspace{2cm}}$

10. $1 + 3 = 2 + \underline{\hspace{2cm}}$

1. $2 + 2 + 4 = 6 + \underline{\hspace{2cm}}$

2. $5 + 1 + 4 = 4 + \underline{\hspace{2cm}}$

3. $9 + 11 = 2 + 4 \underline{\hspace{2cm}}$

4. $8 + 7 = 4 + \underline{\hspace{2cm}}$

5. $6 + 5 = 4 + \underline{\hspace{2cm}}$
