

### 'Making Ten' Strategy Practice

1. Visualize in your mind what numbers need to be added to make ten ( $9 + 1 = 10$ ).
  2. Take the remainder number and break it into parts so you have the number needed to make ten (for example:  $6 = 1 + 5$ , I now have the 1 to add to 9 to make ten).
  3. Now that you have made ten ( $9 + 1 = 10$ ) add on the last number ( $10 + 5$ ) to get your final answer (15).
- I have included some numbers to help you practice the making ten strategy.

1.

$$9 + 6 = \boxed{15}$$
$$9 + 1 = 10$$
$$10 + 5 = \boxed{15}$$

2.

$$9 + 5 = \square$$
$$9 + 1 = \square$$
$$\square + \square = \square$$

3.

$$9 + 8 = \square$$
$$9 + 1 = \square$$
$$\square + \square = \square$$

4.

$$9 + 4 = \square$$
$$9 + 1 = \square$$
$$\square + \square = \square$$

5.

$$8 + 3 = \boxed{11}$$
$$8 + 2 = 10$$
$$10 + 1 = \boxed{11}$$

6.

$$8 + 6 = \square$$
$$8 + 2 = \square$$
$$\square + \square = \square$$

7.

$$8 + 8 = \square$$

$$8 + \textcircled{2} \textcircled{\quad}$$

$$\underline{\quad} + \underline{\quad} = \square$$

8.

$$8 + 4 = \square$$

$$8 + \textcircled{2} \textcircled{\quad}$$

$$\underline{\quad} + \underline{\quad} = \square$$

9.

$$5 + 9 = 14$$

$$\textcircled{5} + \textcircled{5} \textcircled{4}$$

$$\underline{10} + \underline{4} = \boxed{14}$$

10.

$$5 + 8 = \square$$

$$5 + \textcircled{5} \textcircled{\quad}$$

$$\underline{\quad} + \underline{\quad} = \square$$

11.

$$5 + 7 = \square$$

$$5 + \textcircled{5} \textcircled{\quad}$$

$$\underline{\quad} + \underline{\quad} = \square$$

12.

$$5 + 6 = \square$$

$$5 + \textcircled{5} \textcircled{\quad}$$

$$\underline{\quad} + \underline{\quad} = \square$$
