I'm so glad I took the Career Pathways program. I loved being able to try out all the different technologies that were available and found it helped me more academically than I thought it would. Career Pathways also helped me narrow down my dream job and how I would get there. I'm looking forward to entering the Recreation Therapy field. - **Amber Beyer**

While at Mohawk I tried to participate in as many co-curricular activities as possible including being a part of the Career Pathways advisory committee. I was also able to attend the volunteer fair to help build connections with future workplaces. I value the amount of support the college offered to me through Accessible Learning Services and the Learning Support Centre who helped with workshops and tutoring. If it weren't for the Career Pathways program educating me I don't know that I would have been prepared for the Educational Support program I am enrolled in today. - **Hannah W. '19**

My professors were patient with me and my classmates and made sure to ease us slowly into the responsibilities of college life. For many of us, this was our first post-secondary educational experience. Most memorably, there was one assignment where we had to build a tower out of balloons and tape. It taught me and my classmates about communication and coordinating with each other. - **Austin G. '17**
