

# **Auditory Learning Strategies**

**Auditory Learners benefit from:**

- ☐ **talking to others regarding their learning**
- ☐ **rehearsing information out loud**
- ☐ **recording information they want to learn or remember (choose from various forms of technology- iPods, iPads, livescribe pens)**
- ☐ **reading a book and listening to an audio version of that book at the same time (audio books for mp3 players or iPods)**
- ☐ **using a tune to rehearse information they want to learn**
- ☐ **a quiet, focused learning environment (ie. using earphones to block out noise, choosing a quiet space, listening to quiet classical music)**
- ☐ **expanding on notes by talking to others and looking at the textbook (notes may be poor because they like to listen)**
- ☐ **explaining notes to a buddy**
- ☐ **speaking answers out loud or in their head before they write them**
- ☐ **using speech to text software (ie. Dragon Naturally Speaking)**
- ☐ **giving oral reports or answering questions orally**
- ☐ **discuss answer with a partner before writing them down**
