

Grade 7/8 Math Graphing on the Cartesian Plane

Name: _____ Class: _____

Together, let's label the Cartesian Plane below and review how we plot points on it as ordered pairs and then we will discuss how we use it for plotting sequences. Remember to ask questions and take notes as we go through it so it all makes sense to you going forward.

To plot each point or coordinate, you plot the point (first point is along the horizontal axis, the second point is along the vertical. the point is placed at the intersection of these lines)

A (4, 7)

B (-5, -10)
