

# EARTH DAY – PLANT A TREE

## SUM OR DIFFERENCE

a game for 2-4 players      Need: counters, 2 Dice

Players take turns to roll the 2 dice, and find the total or the difference of these 2 numbers. They then place a marker over this number on the board. For example, if a player throws 2 and 6 the player could cover 4 (6-2) or 8 (2+6). Play continues until one of the seedlings is surrounded with a counter on each of the spaces around it. The player who places the last counter to 'plant' the seedling is the winner.
