WHO WE ARE

The Girls SySTEM Mentorship Program aims to empower young innovators to pursue STEM-related study by connecting late elementary and high school students with professional mentors in Science, Technology, Engineering, and Math (STEM) fields. At GSM, we believe that the solutions to the world's leading problems rely on an equitable workforce where diversity fosters innovation and confidence breeds leadership. We tailor our mentorship services according to our mentees' needs and use our participant feedback to ensure that programming is enjoyable, valuable, and inclusive.

BECOME A MENTOR

We are seeking passionate STEM professionals with >1 year of professional experience in their respective field for:

- Voluntary commitment of 2 hours/month
- One-on-one or group mentorship

BECOME A MENTEE

Calling all students in Grades 7-12!

- One-on-one or group mentorship
- Workplace shadowing
- Professional & technical skill development
- FREE events to meet fellow mentees!

APPLY NOW

WHY JOIN TODAY?

- **The percentage of women working in STEM fields has barely changed in almost 30 years**¹
- **Despite similar achievement scores among children of all genders, women are always less likely to choose a STEM program**²

95% of our mentees reported increases in their level of knowledge and awareness of STEM-related opportunities after only 1 year of participation

OUR AIMS

- To increase the availability of STEM-based learning opportunities in the community
- To intervene at a critical period in a young girl's career
- To nurture young women towards professional development & build a bigger talent pipeline of women in STEM
