

# How to make a Galaxy Bottle

# What you will need

## Ingredients:

- Water
- Clear Glue
- Glitter
- Water beads or other small objects
- Food Colouring (optional)

## Other Materials:

- Water bottle
- Super glue

# Step One

Fill the plastic water bottle about 80% full of warm water.

# Step Two

Add water beads or other small objects. (I use 50 water beads and 100 plastic beads)  
Note: Water beads can take up to 8 hours to expand.

# Step Three

Add glitter and food colouring if desired.

# Step Four

Add clear glue until full.

# Step Five

Seal lid with super glue

# Step Six

Shake and enjoy.
