

## Problem of the Week

### Problem C

#### Accumulating Change

Canadian one-dollar coins are referred to as *loonies*. Canadian two-dollar coins are referred to as *toonies*.

Penny Saver has been saving quarters, loonies and toonies in her coin bank for a long time. No other types of coins are in her bank. One third of the coins in the bank are quarters and one fifth of the coins are loonies. There are 56 toonies in the bank.

Determine how much money Penny has saved in her coin bank.
