

Adding & Subtracting Fractions

Last summer, Andrew and Jamal ran a lemonade stand with two kinds of lemonade and also orange juice.

At one point, this is what they had on the table.

The fraction tells how full the pitcher was.

1. Create and solve a problem about the pitchers that makes sense using each type of calculation.

- a) Use addition of fractions with the same denominator.
- b) Use subtraction of fractions with the same denominator.
- c) Use addition of fractions with different denominators. Show the addition using pictures or models.
- d) Use subtraction of fractions with different denominators. Show the subtraction using pictures or models.
